Miller, Product Manager for REV Recreation Group, Inc.'s Class A motorhomes. "The island lends itself to preparing a meal together and entertaining family and friends and our Adap-table™ Dinette provides seating for four."

The exclusive Adap-table Dinette is a multi-purpose station. When positioned along the wall, it serves as a convenient workstation or breakfast bar for two. By swinging the table out vertically, it easily hosts four adults.

The Adap-table Dinette is available in the brand-new Frontier® 36SS from Fleetwood RV while the Discovery® LXE 36HQ and Discovery 36Q feature both the island and Adap-table Dinette.

The bunk room is another area of the coach where Fleetwood RV has applied practical innovation with owner comfort in mind. Select models now feature a top bunk that can be flipped up to create additional wardrobe space. A bar,

is the heart of the [RV](#) recently debuted vances – a patent-ple dinette table and ationary islands in a amenities are

consistent with the Fleetwood brand, which is known for its family-focused enhancements paired with accessible indulgence.

"Everyone gathers in the kitchen, so we designed elements that accommodate how people live today," says Doug

secured by magnets, slides in to create 65-70 inches of hanging space.

American Coach®

[American Coach](#), an award-winning, ultra-luxury brand of recreational vehicles, took a fresh look at the living area and its popular theater seating.

While owners appreciate the comfort of the oversized loungers, they take up valuable floor and walkway space when the coach is in transit or in use. To address that, the American Coach design team worked with its furniture supplier to create Zero Proximity seating. The new seating provides the expected level of comfort yet reduces the amount of space required for full extension.

“On a yearly basis, we review and examine all of the individual areas of our coaches and focus on making continual improvements and advancements that elevate our owner experience,” says Miller.

Renegade RV™

Recognized as a luxury pioneer in Diesel Super C motorhomes, [Renegade RV](#) continues to push innovation forward.

The brand is offering owners a new level of comfort and convenience with its Vienna model, Renegade RV.

“Owners appreciate the solar power,” says Victor. The battery pack and other ancillary components are designed to be freed up valuable space for storage.

In addition, on the interior, full-integration of the Garmin Multi-Plex System controls virtually every element – slide outs, interior lighting, and NVR security system. Touchscreen controls are also available.

Midwest Automotive

[Midwest Automotive](#) is a premier manufacturer of high-quality, ultra-lightweight composite-built truck campers and travel trailers. Its continual pursuit of innovative manufacturing is its hallmark.

“We’re removing propane from the equation to make our campers feel safer and more comfortable,” says Jake. The design team is also focusing on creating a more comfortable interior.

With its Eco-Freedom Package, owners have 600-amp service from a state-of-the-art lithium-ion battery power system that ensures the coach can run for up to three days without tapping into generator power. Eliminating the generator delivers a quieter RV experience while providing a safe, reliable, and environmentally friendly source of AC/DC power.

Lance® Camper

[Lance Camper](#) is a premier manufacturer of high-quality, ultra-lightweight composite-built truck campers and travel trailers. Its continual pursuit of innovative manufacturing is its hallmark.

Lance was one of the first manufacturers to make rooftop solar panels available as an OEM option, recognizing the benefits of solar power. With multiple panels now available and input ports for portable systems, optional power inverters, and lithium battery packages, Lance continues to lead the way in “off the grid” generator-free power solutions.

Throughout the entire industry, Lance was also one of the first RV companies to incorporate CNC machines. The automated CNC process ensures the consistent cutting of materials and delivers accuracy of parts for each Lance
