accessories, vital equipment and more. A recent review of REV ambulances* equipped with the ZeroRPM Idle Mitigation System demonstrated the following benefits, on average:

- 75% reduction in engine idle times
- 1,634 fewer engine hours per year, which means less wear and tear
- A savings of 7,620 gallons of fuel over 5 years
- A reduction of 85 tons of CO₂ over 5 years

"Through our partnership with ZeroRPM, our ambulances become hybrid when parked and idling, using electricity instead of fuel to power the vehicle," said Anoop Prakash, President, REV Ambulance Group. "Most ambulances spend many hours a day idling at the scenes of an incident, or waiting for a call, and our solution serves our

REV Group Extends Partnership with ZeroRPM to All Ambulance Brands

REV Group Extends Partnership with ZeroRPM to All Ambulance Brands

Specialty vehicles and equipment manufacturers have increasingly integrated and adopted ZeroRPM technology into their vehicles. REV Group is the first to do this across all of its ambulance brands, including AEV, American, and REV Ambulance Group. The ZeroRPM system is a cost-effective and reliable solution that reduces the negative impact of vehicle idling on the environment, personal health, and operational costs.

ZeroRPM Idle Mitigation Systems reduce the negative impact of vehicle idling on the environment, personal health, and operational costs. The system uses a combination of sensors and software to detect when a vehicle is idling and automatically turns off the engine. This allows the vehicle to continue to operate while the engine is off, which reduces fuel consumption, emissions, and maintenance costs.

REV Group has been using ZeroRPM technology in its ambulances for several years. The company has found that the technology reduces the negative impact of vehicle idling on the environment, personal health, and operational costs. The system uses a combination of sensors and software to detect when a vehicle is idling and automatically turns off the engine. This allows the vehicle to continue to operate while the engine is off, which reduces fuel consumption, emissions, and maintenance costs.

customers by reducing engine wear, fuel consumption and emissions. We are excited to extend our partnership and advance our technical integration to benefit EMS crews, ambulance fleet owners and our environment."

"Together, with the brands of REV Ambulance Group, we have tremendous reach in the market which amplifies our ability to make a positive impact on the EMS community and keep our brand promise to end idling," said Lance Self, CEO, ZeroRPM.

About REV Group, Inc.

REV Group® (REVG) is a leading designer and manufacturer of specialty vehicles and related aftermarket parts and services. We serve a diversified customer base, primarily in the United States, through three segments: Fire & Emergency, Commercial, and Recreation. We provide customized vehicle solutions for applications, including essential needs for public services (ambulances, fire apparatus, school buses, and transit buses), commercial infrastructure (terminal trucks and industrial sweepers) and consumer leisure (recreational vehicles). Our diverse portfolio is made up of well-established principal vehicle brands, including many of the most recognizable names within their industry. Several of our brands pioneered their specialty vehicle product categories and date back more than 50 years. REV G

About ZeroRPM, Inc.

Founded in 2012 through a strategic partnership at Wallace State Community College, ZeroRPM provides OEM plants to custom manufacturers with the ability to reduce emissions. ZeroRPM is a leader in the industry, providing an effective and practical solution to the problem of vehicle emissions.
