

# REV GROUP SPECIALTY VEHICLE SERVICE - REGIONAL SERVICE CENTER

Feb. 18th, 2016

## REV PUTS FINISHING TOUCHES ON SOUTHERN REGIONAL CENTER WHILE LOCATING

*REV offers regional technical service.*

REV Group, Inc., continues to expand its regional technical center network by building a massive foot print in the South. The new center will be able to accommodate up to 12 bays.

The newest technical center will feature a staff of RVIA-certified technicians, a 12-bay service facility with a staff of RVIA-certified technicians, a state-of-the-art, 55-foot paint booth for collision repair, and a 24-hour service center. In addition, the center will offer added convenience, through a dedicated service center for REV customers. In the near future, the center will offer complimentary WiFi and more.

Meanwhile, as the paint dries on REV's newest facility, the ink is still fresh on REV's newest deal — the purchase of 11.3 acres of commercial property for a brand-new Southwest REV Technical Center in Mesquite, Nev. REV will soon begin exploring architectural plans and contractor services to build the new facility, ranging anywhere from 40,000-80,000 sq. ft. The facility's scheduled completion date will be in 2017. The location, just 85 miles northeast of Las Vegas, is situated right on the I-15 corridor for the ultimate in customer convenience. Campsites are also planned for this service center.

These new technical centers join two other state-of-the-art REV Regional Technical Centers — the East Coast REV Technical Center in Decatur, Ind., and the West Coast REV Technical Center in Coburg, Ore. The Indiana center is the largest at 84,800 sq. ft. with soon to be 49 paved campsites.

"As REV continues to expand its footprint, we want to be accessible to our customers," says Steve Heim, Vice President and General Manager of REV's Aftermarket Parts and Service. "Not only do we want to take care of our customers, but we want to create value for our dealers. When customers are on the road away from their dealer service center, we want to be able to provide readily accessible parts and designated service facilities. It's just another trusted feature that our dealers can sell to new customers."

REV plans to continue to aggressively grow its regional approach to service. More locations are being planned. "Customers shouldn't have to go the extra mile for quality service," Heim says. "It's the company that should go to the customer."

distance, which is why we're focusing on growing these regional efforts."
